LOCATION

Lyangu: Located with easy access to the western area of the park and a relatively short drive from the park boundary, this convenient site is on the edge of a large plain. Throughout different times of the year hyena, lechwe and wildebeest are regularly seen and birdlife at the pans is splendid.

Katoyana: Located near the centre of the park and allows access to the woodlands, pans and plains in the eastern area of the park. There are hyena dens nearby, lion and cheetah are often sighted and birdlife is prolific. Its shady position and many pans nearby make it a favourite.

Kwale: Located in the southern part of the park, buffalo herds are frequently sighted and the area around the sausage tree is frequented by many mammals, especially in the later part of the year. Beautiful and shaded, it is a win for birders too.

Mukalabumbu: Located in the northern part of the park, between Katoyana and Sikale campsites, Mukalabumbu is the most convenient campsite for exploring the north. With Miyanda pools lying just 4km southeast of the campsite, the area is a win for birdlife. Lion sightings are most frequent around this area.

Sikale: Located in the far north, this site is more challenging to access. It is truly a wilderness campsite, so self-sufficiency is key. In the cooler months the wildebeest congregate near this camp and is a beautiful, remote and quiet place to visit.
